Profile

I am a highly skilled Python full-stack developer with two years of professional experience. I have a passion for building robust and scalable web applications using modern frameworks and technologies. I thrive in dynamic environments and enjoy collaborating with cross-functional teams to deliver high-quality software solutions. With a strong background in both front-end and back-end development, I am adept at designing intuitive user interfaces and implementing efficient server-side logic. I am committed to continuously learning and staying up-to-date with the latest advancements in the Python ecosystem.

Skills

- Programming Languages: Python, JavaScript, HTML, CSS, PHP
- Front-End Development: HTML5, CSS3, JavaScript, JQuery
- Back-End Development: Python, Django, PHP
- Databases: MySQL, MongoDB
- Version Control: Git, GitHub
- RESTful API Development
- Test-Driven Development (TDD)
- Agile Methodologies
- Problem-solving and debugging

Work Experience:

Python Developer

06/2021 to Present

Oliveboard Compact Private Limited, Bangalore

- Collaborated with a cross-functional team to develop and maintain a web application using Python and Django on the back-end and front-end.
- Implemented RESTful APIs to enable seamless communication between the front-end and back-end systems.
- Designed and developed responsive user interfaces using modern front-end frameworks, ensuring a smooth and intuitive user experience.
- Conducted thorough testing and debugging to identify and resolve any software defects.
- Worked closely with UX/UI designers to transform wireframes and mockups into interactive web pages.
- Participated in code reviews and provided constructive feedback to team members.
- Contributed to the continuous improvement of development processes and workflows.
- Actively researched and incorporated new technologies and best practices into the development stack.

Python/Django Intern

Netzwerk Academy, Bangalore

02/2021 – 05/2022

- Weather app using Django framework that gets real time and forecast current eathers for multiple cities.
- Utilized Python, Django to design server applications and client interfaces.
- Handled development and management of front-end user interfaces with help of HTML Output comes in Real world application.

Education

MANIPAL UNIVERSITY, Jaipur

Bachelor's Degree in Computer application (BCA)

2021 - 2024

P.V.P POLYTECHINC AIT CAMPUS , Bangalore

Diploma in Computer science and engineering (CS&E)

2017 – 2020

Projects:

1. ed-tech Web Application (2022)

- Developed a full-stack ed-tech platform using python,php and Django
- Implemented features such as user authentication, product listing, post login functionality, and payment integration.
- Utilized modern front-end libraries and frameworks to create an engaging user interface.
- Integrated with various third-party APIs for payment processing.
- Implemented efficient database models and queries for handling product inventory and user orders.
